First **online** grain market in Spain, aimed at farmers, ranchers, warehousemen, manufacturers and all operators in the cereal market.

Digital platform with access to real market data with purchase and sale options throughout the national territory.

Free mobile app with access to real market data.

Our solution

- **Real-time Data Access**
- **Machine Learning Integration**
- **Natural Language Communication**
- **Multilingual Support**
- **24/7 Availability**
- **Multi-Platform Deployment**
(SMS, WhatsApp, Telegram, Slack, and more)

The screenshot shows a web-based chat interface. At the top, there's a navigation bar with a search field labeled "Go to" and a dropdown menu set to "Chat". Below this is a header for "Abastores Assistant". The main area contains a conversation between a user and the bot. The user asks "Hello, how can you help me?", and the bot responds with a message icon and text: "Como asistente en Abastores, estoy aquí para ayudarte con cualquier pregunta que tengas sobre los precios de los cultivos y datos agrícolas. Puedo proporcionarte información actualizada sobre los precios de varios productos agrícolas, detallar desde qué fuente proviene la información y especificar la provincia para la que es relevante la información. ¿Hay algo específico que te gustaría saber?". A large green arrow points from the user's message to the bot's response. At the bottom, there's a text input field labeled "Your message" with a send button icon.

Abastores Assistant

¡Bienvenido al ChatBot! Aquí puedes hacer preguntas sobre datos y análisis relacionados con Precios de Cultivos. Recuerda que el ChatBot está en fase de pruebas, por lo que puede que no tenga respuestas para todas las preguntas.

Y Hello, how can you help me?

Como asistente en Abastores, estoy aquí para ayudarte con cualquier pregunta que tengas sobre los precios de los cultivos y datos agrícolas. Puedo proporcionarte información actualizada sobre los precios de varios productos agrícolas, detallar desde qué fuente proviene la información y especificar la provincia para la que es relevante la información. ¿Hay algo específico que te gustaría saber?

2d ...

This is a huge step to democratise and add transparency to the agrifood sector in an accessible, intuitive and hands-on way. Giving all the AI power to the users to understand the agro-market.

It's being a pleasure to work and collaborate with such a great talented and decision-making team. We've built an amazing and top-notch product that will be used by thousands of people.

Congratulations [AGIA](#) & [Abastores](#) team! 🚀
